```java
public class Employee {

    private int id;
    private String name;
    private String department;

    public Employee() {
    }

    private int age;

    public int getId() {
        return id;
    }

    public void setId(int id) {
        this.id = id;
    }

    public String getName() {
        return name;
    }

    public void setName(String name) {
        this.name = name;
    }

    public String getDepartment() {
        return department;
    }

    public void setDepartment(String department) {
        this.department = department;
    }

    public int getAge() {
        return age;
    }
```

```java
        public void setAge(int age) {
            this.age = age;
        }

        public Employee(int id, String name, String department, int age) {
            this.id = id;
            this.name = name;
            this.department = department;
            this.age = age;
        }
    }
```
